Heat and Pressure Resistant PET Bottle (HPR PET Bottle) refers to a PET bottle designed to withstand both elevated thermal load and internal pressure at the same time. It is typically used for carbonated or low-carbonated beverages that require heat sterilization / post-sterilization, such as juice-containing carbonated drinks, lactic beverages, milk-based drinks, or rice wine products. In practice, this type of bottle usually combines a crystallized neck finish for heat resistance with a petaloid (five-foot) base for pressure resistance.

This report studies the global Heat and Pressure Resistant PET Bottle production, demand, key manufacturers, and key regions.
