Abstracts

Heat resistant coatings also known as passive fire protection or intumescent coatings provide protection to equipment and structures from fire or flames with high temperature. These coatings are used to protect the spread of fire or lessen the damage caused by fire to surfaces. Heat resistant coatings are mostly used in the Civil Construction and Oil and Gas industries.

Scope of the Report:

This report focuses on the Heat Resistant Coatings in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes The market based on manufacturers, regions, type and application.

The automotive and other transportation industry in Asia-Pacific has been undergoing rapid growth in the recent years owing to the shifting manufacturing base from western economies. This is majorly due to the low costs of labor, along with the presence of large and approachable consumer base in the region. The automotive production in the region has been on the increase in the past few years and is expected to grow further at a significant rate, majorly in countries such as China, India, Indonesia, and Vietnam.

Heat resistant coatings are employed during automotive manufacturing processes, majorly for automotive spline, exhausts, grills, and few electrical components. They aid in maintaining the color as well as providing necessary thermal and chemical resistance to the applied components. The booming automotive production activities in Asia-Pacific are expected to increase the consumption of heat resistant coatings in the region at a significant rate in the coming years.

Asia-Pacific is expanding at a higher rate for heat resistant coatings market. Some of the main reasons for the expansion are growing and emerging economies,

transportation industry, increasing FDI, low-cost labor, etc. With the ongoing rapid industrialization in the region, mainly in China and India, the usage of heat resistant coatings in flammable fluid pipelines is growing significantly due to new innovations and technological advancements in the region. These are to support the growth for heat resistant coatings in the region.

The worldwide market for Heat Resistant Coatings is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
