Heat sealable fabric is a type of fabric that can be sealed or bonded together using heat. This fabric is often made from synthetic materials such as polyester or nylon, which have a low melting point. When heat is applied to the fabric, the fibers melt and fuse together, creating a strong and durable bond. Heat sealable fabric is commonly used in various industries, including clothing manufacturing, packaging, and medical applications. It is often used for creating seams, hemming edges, or attaching patches or labels to garments or other textile products.
