Heavy Duty Butt Hinges are a specific type of hinge designed to provide a strong and durable connection for applications where significant weight, frequent use, and harsh conditions are expected. Comprising two leafs or plates, typically made of robust materials like steel, stainless steel, or high-strength alloys, they are joined by a hinge pin. These hinges are engineered with features such as thick leafs, large-diameter pins, and often additional reinforcements to handle heavy loads and ensure smooth rotational movement. They are commonly used to attach doors, gates, cabinets, or other large and heavy structures that require reliable pivoting, making them essential in industrial, construction, automotive, and other sectors where heavy-duty performance is a necessity.
