With the increasing demand, numerous countries are investing in overseas mining operations in the region. The growing population, rapid urbanization, and widespread infrastructure development in the developed and developing countries such as China, India, Indonesia, and African countries has also increased the need for mining activities due to the increase in the consumption of metals and minerals such as iron, copper, limestone, and shale gas. To cater to this growing demand, governments across the world are also increasingly investing in the mining industry. This will significantly benefit the growth of the heavy-duty trucks market during the forecast period.

The growing demand for alternative fuel heavy duty trucks is one of the latest trends contributing to the growth of this market in the forthcoming years. The rising concerns about vehicle emissions and environmental pollutions have initiated many major countries to introduce emission regulations especially for the commercial vehicles. These regulations compel manufacturers to find alternative fuel solutions for the trucks that are environment-friendly or provide assistance in reducing emissions. This will in turn, has led to the introduction of biofuel, electric, and hybrid heavy duty trucks.

The worldwide market for Heavy Duty Trucks is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
