Heavy-duty welded bar grating is a type of industrial flooring made from flat steel bars that are welded together at right angles to create a strong, durable and slip-resistant surface. The bars are welded together by heat-fusing them to perpendicular crossbars, which are then attached to a frame to create the finished grating. Heavy-duty welded bar grating is designed to withstand heavy loads and high traffic, making it ideal for use in industrial and commercial settings such as factories, warehouses, and construction sites.
