The global Heavy Equipment market size is expected to reach \$ 718190 million by 2032, rising at a market growth of 3.1% CAGR during the forecast period (2026-2032).

Heavy equipment refers to heavy-duty vehicles, specially designed for executing construction tasks, most frequently ones involving earthwork operations. They usually comprise five equipment systems: implement, traction, structure, power train, control and information. Heavy equipment functions through the mechanical advantage of a simple machine, the ratio between input force applied and force exerted is multiplied. Some equipment uses hydraulic drives as a primary source of motion.

Global Heavy Equipment key players include Caterpillar, John Deere, KOMATSU, CNH Industrial, etc. Global top four manufacturers hold a share about 20%.

China is the largest market, with a share about 25%, followed by North America and Europe, both have a share over 40 percent.

In terms of product, Dump Truck is the largest segment, with a share over 10%. And in terms of application, the largest application is Construction, followed by Mining

Agriculture, etc.
