According to our (Global Info Research) latest study, the global Heavy Metal Scavenger market size was valued at USD 154.3 million in 2022 and is forecast to a readjusted size of USD 229.6 million by 2029 with a CAGR of 5.8% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The implementation of stringent regulations on the discharge of heavy metals, including copper, lead, mercury and cadmium, is a key factor driving the growth of the metal scavenger market. The rise of metal scavengers in the water treatment industry is also driving the market. In addition, rapid urbanization, growth in industrial activity, and an increase in stringent environmental regulations to control water pollution are driving the global metal scavenger market.

Metal scavenging agents play a vital role in environmental protection by removing heavy metal contaminants

from wastewater and industrial effluents. These agents help prevent the release of toxic metals into water

bodies, soil, and the atmosphere, thus safeguarding ecosystems and human health.
