Abstracts

The global Heavy Metal Scavenger market size is expected to reach \$ 229.6 million by 2029, rising at a market growth of 5.8% CAGR during the forecast period (2023-2029).

The implementation of stringent regulations on the discharge of heavy metals, including copper, lead, mercury and cadmium, is a key factor driving the growth of the metal scavenger market. The rise of metal scavengers in the water treatment industry is also driving the market. In addition, rapid urbanization, growth in industrial activity, and an increase in stringent environmental regulations to control water pollution are driving the global metal scavenger market.

Metal scavenging agents play a vital role in environmental protection by removing heavy metal contaminants

from wastewater and industrial effluents. These agents help prevent the release of toxic metals into water

bodies, soil, and the atmosphere, thus safeguarding ecosystems and human health.
