Abstracts

Helicopter blades are crucial components of a rotorcraft as they are accountable for effective aerodynamic forces which offer safety. The constantly growing demand for helicopters has propelled vendors to focus on using new technologies such as additive manufacturing (AM) for value creation in prototyping, tooling, concept modeling, and production of selected components.

Scope of the Report:

This report focuses on the Helicopter Blades in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Increasing deliveries of helicopters, advancement in the blade technology such as electric tail rotor systems, continuous shift from heavy metal blades to lightweight composite blades, and rising helicopter fleet size are some of the major growth drivers of the global helicopter blades market. Military and civil/military segments currently dominate the helicopter blades market, driven by high deliveries of helicopters and large fleet size. However, civil and parapublic segment is projected to witness the highest growth during the forecast period, driven by increasing demand for light single-engine and intermediate & medium twin-engine civil helicopters.

The worldwide market for Helicopter Blades is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
