## Abstracts

According to our (Global Info Research) latest study, the global Helicopter Simulator market size was valued at USD 385 million in 2023 and is forecast to a readjusted size of USD 594.9 million by 2030 with a CAGR of 6.4% during review period.

A flight simulator is a device that artificially re-creates aircraft flight and the environment in which it flies, for pilot training, design, or other purposes. It includes replicating the equations that govern how aircraft fly, how they react to applications of flight controls, the effects of other aircraft systems, and how the aircraft reacts to external factors such as air density, turbulence, wind shear, cloud, precipitation, etc. Flight simulators are widely used in pilot training, aircraft design, airborne equipment testing and other applications. The primary purpose of utilization of flight simulator is to train a pilot to achieve, test, and maintain proficiency in the operation of an airplane without risk to person or property and at a lower cost to training in the air.

Global main manufacturers of helicopter simulator include CAE, Thales and Reiser Simulation and Training, etc. The top three players hold a share about 58%. The global helicopter simulators are mainly produced in United States and Europe, they occupied for a share over 88%. North America is the largest market, has a share about 44%, followed by Europe and Asia-Pacific, with share 29% and 20%, separately.
