Helicopter Underwater Egress Training Facility is a specialized simulation center designed to teach helicopter occupants, particularly those in the military and commercial aviation sectors, how to safely escape from a submerged aircraft. This facility uses controlled, realistic underwater environments to train individuals in egress techniques, including the use of emergency exits, escape slides, and the operation of egress equipment. Trainees learn to manage panic, perform self-rescue, and assist others in an emergency, improving their ability to survive a helicopter ditching event. The training often involves the use of full-scale mock-ups of helicopter cabins that can be submersed in water, allowing for practical and repetitive practice in a controlled setting.
