The global Helideck Status Light market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Helideck status light is a lighting system specifically designed for helidecks on offshore platforms or vessels. It is used to communicate the operational status of the helideck to helicopters approaching or operating on the helideck. The status light typically consists of colored lights mounted on the perimeter of the helideck. Each color corresponds to a specific status, such as ready for landing, in operation, or closed. The lights can be remotely controlled to change their color and flash patterns, ensuring clear and visible indications to helicopter pilots and ground personnel. The helideck status light is an essential safety feature that helps to maintain effective communication and manage helicopter operations on the helideck.
