Abstracts

Heliox (Helium/Oxygen Mixtures) is a breathing gas composed of a mixture of helium (He) and oxygen (O₂). Heliox is a medical treatment for patients with difficulty breathing. The mixture generates less resistance than atmospheric air when passing through the airways of the lungs, and thus requires less effort by a patient to breathe in and out of the lungs. Heliox is also used in saturation diving and sometimes during the deep phase of technical dives.

This report studies the global Heliox production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Heliox, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2021 as the base year. This report explores demand trends and competition, as well as details the characteristics of Heliox that contribute to its increasing demand across many markets.

The global Heliox market size is expected to reach \$ 43 million by 2028, rising at a market growth of 4.8% CAGR during the forecast period (2022-2028).
