He-3 (helium 3) proportional counter tube is a very effective detector for detecting neutrons. It is often used to measure the intensity of thermal neutrons and epithermal neutrons with high efficiency; compared with other proportional counter tubes, He-3 proportional counter tubes have higher detection efficiency and wider energy response range; due to the He-3 proportional counter tube -3 is an inert gas with good stability, so the use of He-3 proportional counter tube for neutron measurement under high temperature conditions has greater advantages than other detectors.
