Abstracts

According to our (Global Info Research) latest study, the global Helium-free MRI Magnet market size was valued at US$ 177 million in 2025 and is forecast to a readjusted size of US$ 274 million by 2032 with a CAGR of 6.3% during review period.

Helium-free MRI Magnet refers to the main magnetic-field generation component used in magnetic resonance imaging systems that substantially eliminates dependence on conventional large-volume liquid-helium cooling. The product primarily uses conduction cooling, cryocooler-based cooling, or sealed-for-life magnet architectures to maintain the superconducting operating environment while reducing helium inventory, replenishment requirements, installation constraints, and cryogenic infrastructure dependence. Depending on system design, the market covers Low-field MRI Magnet (<1.0 T), Mid-field MRI Magnet (1.0–<1.5 T), High-field MRI Magnet (1.5–3.0 T), and Ultra-high-field MRI Magnet (>3.0 T). Helium-free MRI Magnet combines superconducting coil design, cryogenic engineering, thermal management, quench protection, magnetic shielding, and field-homogeneity technologies. Its downstream applications primarily include clinical diagnosis, preclinical research, scientific research, and veterinary medicine, where stable magnetic-field performance, reduced cryogenic maintenance, and greater flexibility in MRI installation and lifecycle operation are increasingly important.

Key Findings

High-field 1.5–3.0 T magnets represent a key commercial field-strength segment for Helium-free MRI Magnet

+357 96 030922
info@marketpublishers.com

Clinical diagnosis is the principal downstream application for commercial Helium-free MRI Magnet deployment

Sealed-for-life and conduction-cooled architectures are reducing dependence on conventional high-volume liquid-helium magnet systems

Helium-free magnet technology is expanding from clinical MRI toward preclinical and scientific research applications

Reduced helium dependence is becoming an important consideration in MRI installation and lifecycle management

Market Trends

Helium-free MRI Magnet technology is evolving from conventional superconducting architectures dependent on large liquid-helium reservoirs toward low-helium sealed, conduction-cooled, and cryocooler-cooled designs. Product development increasingly emphasizes lower cryogen inventory, simplified siting requirements, enhanced thermal stability, and improved recovery capability following abnormal operating conditions. In clinical MRI, this transition is particularly relevant to 1.5–3.0 T systems, where manufacturers must balance field strength, image quality, bore design, magnet weight, cooling efficiency, and lifecycle reliability. Meanwhile, advances in superconducting materials, cryocooler efficiency, thermal conduction structures, and magnet protection are supporting further development of true cryogen-free architectures. The technology is also extending into preclinical and scientific research systems, where compact dry magnets and higher-field configurations can reduce dependence on specialized cryogenic infrastructure.

Market Dynamics

Drivers

The primary market driver is the MRI industry's need to reduce operational dependence on liquid helium. Conventional superconducting MRI magnets require sophisticated cryogenic systems and expose healthcare facilities to helium supply, replenishment, siting, and lifecycle maintenance considerations. Helium-free MRI Magnet architectures can substantially reduce the quantity of helium required or eliminate routine helium

+357 96 030922
info@marketpublishers.com

replenishment, thereby improving installation flexibility and simplifying magnet lifecycle management. Continued deployment of MRI capacity, particularly in facilities where conventional cryogenic infrastructure is difficult or costly to establish, further supports adoption.

Restraints

Technical complexity remains a major constraint. Maintaining superconducting operating temperatures without a conventional large-volume liquid-helium reservoir requires highly reliable cryocoolers, thermal conduction structures, vacuum insulation, superconducting coils, and protection systems. Clinical MRI applications additionally demand stringent magnetic-field homogeneity, long-term stability, low vibration, and high system availability. Development and qualification costs are therefore significant, while the long operating life expected from MRI magnets means that healthcare institutions generally require extensive reliability validation before adopting substantially different magnet architectures.

Opportunities

The strongest opportunity lies in extending helium-free architectures across mainstream clinical MRI platforms while improving accessibility in hospitals, outpatient imaging centers, and locations with limited cryogenic infrastructure. Further opportunities exist in compact MRI, dedicated imaging systems, veterinary imaging, and preclinical research, where reduced installation requirements can have substantial economic value. Improvements in superconducting materials and conduction-cooling technologies may also enable broader field-strength coverage, creating opportunities for higher-field research systems and new magnet configurations with lower helium dependence.

Challenges

Long-term reliability, thermal stability, quench management, cryocooler durability, and serviceability remain important engineering challenges. Different manufacturers also use different technical definitions for helium-free, cryogen-free, sealed-for-life, and ultra-low-helium architectures, which can complicate direct product comparison. For suppliers, another challenge is achieving competitive manufacturing economics while meeting demanding requirements for magnetic-field uniformity, superconducting coil precision, shielding, vibration control, patient safety, and multi-year operational stability.

+357 96 030922
info@marketpublishers.com

Industry Chain Analysis

The upstream industry chain for Helium-free MRI Magnet consists primarily of superconducting wire and related conductor materials, high-purity structural and thermal-management materials, cryocoolers, vacuum components, power and protection devices, magnetic shielding materials, precision mechanical components, and specialized manufacturing equipment. Magnet manufacturing represents the technically intensive midstream stage, involving superconducting coil winding, structural engineering, cryogenic and thermal design, vacuum integration, magnetic-field correction and shimming, quench protection, testing, and system qualification. The magnet is subsequently integrated with gradient coils, RF systems, electronics, patient handling systems, control software, and imaging reconstruction platforms to form a complete MRI system.

Downstream demand comes from clinical MRI manufacturers and healthcare institutions, as well as preclinical imaging, scientific research, and veterinary imaging markets. Value creation is concentrated in superconducting magnet design, cryogenic architecture, manufacturing precision, field homogeneity, reliability, and lifecycle engineering capability. Compared with conventional MRI magnets, Helium-free MRI Magnet places greater technical emphasis on heat transfer efficiency, cryocooler integration, thermal stability, and protection against loss of superconducting conditions. These requirements create relatively high technological and manufacturing barriers and make long-term engineering validation an important component of commercialization.

Segment Insights

By cooling architecture, Conduction-cooled MRI Magnet and Cryocooler-cooled MRI Magnet represent important routes toward reducing or eliminating reliance on conventional liquid-helium reservoirs, while Sealed-for-life MRI Magnet provides another commercial route by retaining only a limited sealed cryogen inventory designed to minimize routine replenishment. The architectures differ in thermal design, cryogenic configuration, maintenance requirements, and technical maturity, allowing manufacturers to address different MRI system requirements.

By magnetic field strength, High-field MRI Magnet (1.5–3.0 T) is particularly important for clinical commercialization because 1.5 T and 3.0 T systems occupy central positions in mainstream diagnostic imaging. Low-field and Mid-field products can support

+357 96 030922
info@marketpublishers.com

compact or application-specific MRI configurations, while Ultra-high-field MRI Magnet (>3.0 T) is more closely associated with preclinical imaging, brain science, advanced medical imaging, and other research applications. The ability to extend helium-free cooling toward higher magnetic fields represents an important area of technological development.

Downstream Market Opportunities

Clinical diagnosis represents the primary downstream opportunity for Helium-free MRI Magnet, particularly across neurological, spinal, musculoskeletal, abdominal, and cardiovascular MRI examinations. Reduced helium dependence can improve installation flexibility and lifecycle management for hospitals and imaging centers. Preclinical research creates additional demand through small-animal imaging, disease models, drug development, and in vivo imaging, while scientific research requires specialized magnets for brain science, functional imaging, medical imaging research, and ultra-high-field experiments. Veterinary medicine provides another application opportunity as advanced diagnostic imaging expands across companion-animal and specialized veterinary facilities.

Regional Insights

North America, Europe, and Asia Pacific constitute the principal commercial regions for Helium-free MRI Magnet, although their demand structures differ. North America and Europe have mature MRI installed bases and strong demand for system replacement, lifecycle cost optimization, and advanced clinical imaging, creating favorable conditions for sealed and low-helium magnet architectures. These markets also contain significant research infrastructure supporting higher-field and specialized magnet applications.

Asia Pacific combines expanding healthcare imaging capacity with a substantial MRI manufacturing and supply-chain base. China, Japan, and other regional markets provide opportunities through hospital imaging infrastructure expansion, domestic MRI equipment development, and localization of superconducting magnet technologies. Regional growth opportunities increasingly depend not only on MRI system demand but also on the ability to localize superconducting materials, cryogenic components, magnet manufacturing, and after-sales engineering capabilities.

Competitive Landscape Analysis

+357 96 030922
info@marketpublishers.com

The Helium-free MRI Magnet market has relatively high technical barriers because suppliers must combine expertise in superconducting magnet engineering, cryogenics, precision manufacturing, magnetic-field control, system integration, and long-term reliability. Competition involves both vertically integrated MRI manufacturers developing proprietary magnet architectures for their own systems and specialized superconducting magnet manufacturers supplying magnets or magnet technologies to external customers. Competitive differentiation increasingly centers on helium inventory, cooling architecture, field strength, magnet footprint and weight, field homogeneity, quench management, installation requirements, reliability, and lifecycle serviceability. In mainstream clinical applications, suppliers capable of industrializing helium-independent or sealed-for-life technologies at 1.5–3.0 T have an important commercialization advantage, while specialized magnet manufacturers retain opportunities in preclinical, scientific research, and customized higher-field systems.

Report Scope

This report is a detailed and comprehensive analysis for global Helium-free MRI Magnet market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Helium-free MRI Magnet market size and forecasts, in consumption value ($ Million), sales quantity (Units), and average selling prices (K US$/Unit), 2021-2032

Global Helium-free MRI Magnet market size and forecasts by region and country, in consumption value ($ Million), sales quantity (Units), and average selling prices (K US$/Unit), 2021-2032

Global Helium-free MRI Magnet market size and forecasts, by Type and by Application, in consumption value ($ Million), sales quantity (Units), and average selling prices (K US$/Unit), 2021-2032

+357 96 030922
info@marketpublishers.com

Global Helium-free MRI Magnet market shares of main players, shipments in revenue ($ Million), sales quantity (Units), and ASP (K US$/Unit), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Helium-free MRI Magnet

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Helium-free MRI Magnet market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Scientific Magnetics, Bruker, JEOL Ltd, Cryomagnetics, Philips Healthcare, Fujifilm Healthcare, Tesla Engineering, American Magnetics, Siemens Healthineers, ASG Superconductors, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Helium-free MRI Magnet market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market Segmentation

Market segment by Type

Conduction-cooled MRI Magnet

+357 96 030922
info@marketpublishers.com

Cryocooler-cooled MRI Magnet

Sealed-for-life MRI Magnet

Market segment by Field Strength

Low-field MRI Magnet (<1.0 T)

Mid-field MRI Magnet (1.0–<1.5 T)

High-field MRI Magnet (1.5–3.0 T)

Ultra-high-field MRI Magnet (>3.0 T)

Market segment by Application

Clinical Diagnosis (MRI Examinations of the Nervous System, Spine, Musculoskeletal System, Abdomen, Cardiovascular System, etc.)

Preclinical Research (Small Animal Imaging, Disease Models, Drug Development, In Vivo Imaging)

Scientific Research (Brain Science, Functional Imaging, Medical Imaging Research, Ultra-High Field MRI Research)

Veterinary Medicine (MRI Diagnosis of Pets, Companion Animals, and Large Animals)

Major players covered

Scientific Magnetics

Bruker

JEOL Ltd

+357 96 030922

Cryomagnetics

Philips Healthcare

Fujifilm Healthcare

Tesla Engineering

American Magnetics

Siemens Healthineers

ASG Superconductors

Oxford Instruments

Huate Magnetoelectric

Mediso

Market segment by region, regional analysis covers

North America (United States, Canada, and Mexico)

Europe (Germany, France, United Kingdom, Russia, Italy, and Rest of Europe)

Asia-Pacific (China, Japan, Korea, India, Southeast Asia, and Australia)

South America (Brazil, Argentina, Colombia, and Rest of South America)

Middle East & Africa (Saudi Arabia, UAE, Egypt, South Africa, and Rest of Middle East & Africa)

Chapter Outline

Chapter 1, to describe Helium-free MRI Magnet product scope, market overview,

+357 96 030922
info@marketpublishers.com

market estimation caveats and base year.

Chapter 2, to profile the top manufacturers of Helium-free MRI Magnet, with price, sales quantity, revenue, and global market share of Helium-free MRI Magnet from 2021 to 2026.

Chapter 3, the Helium-free MRI Magnet competitive situation, sales quantity, revenue, and global market share of top manufacturers are analyzed emphatically by landscape contrast.

Chapter 4, the Helium-free MRI Magnet breakdown data are shown at the regional level, to show the sales quantity, consumption value, and growth by regions, from 2021 to 2032.

Chapter 5 and 6, to segment the sales by Type and by Application, with sales market share and growth rate by Type, by Application, from 2021 to 2032.

Chapter 7, 8, 9, 10 and 11, to break the sales data at the country level, with sales quantity, consumption value, and market share for key countries in the world, from 2021 to 2026.and Helium-free MRI Magnet market forecast, by regions, by Type, and by Application, with sales and revenue, from 2027 to 2032.

Chapter 12, market dynamics, drivers, restraints, trends, and Porters Five Forces analysis.

Chapter 13, the key raw materials and key suppliers, and industry chain of Helium-free MRI Magnet.

Chapter 14 and 15, to describe Helium-free MRI Magnet sales channel, distributors, customers, research findings and conclusion.

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope
1.2 Market Estimation Caveats and Base Year
1.3 Market Analysis by Type
  1.3.1 Overview: Global Helium-free MRI Magnet Consumption Value by Type: 2021 Versus 2025 Versus 2032
  1.3.2 Conduction-cooled MRI Magnet
  1.3.3 Cryocooler-cooled MRI Magnet
  1.3.4 Sealed-for-life MRI Magnet
1.4 Market Analysis by Field Strength
  1.4.1 Overview: Global Helium-free MRI Magnet Consumption Value by Field Strength: 2021 Versus 2025 Versus 2032
  1.4.2 Low-field MRI Magnet (<1.0 T)
  1.4.3 Mid-field MRI Magnet (1.0–<1.5 T)
  1.4.4 High-field MRI Magnet (1.5–3.0 T)
  1.4.5 Ultra-high-field MRI Magnet (>3.0 T)
1.5 Market Analysis by Application
  1.5.1 Overview: Global Helium-free MRI Magnet Consumption Value by Application: 2021 Versus 2025 Versus 2032
  1.5.2 Clinical Diagnosis (MRI Examinations of the Nervous System, Spine, Musculoskeletal System, Abdomen, Cardiovascular System, etc.)
  1.5.3 Preclinical Research (Small Animal Imaging, Disease Models, Drug Development, In Vivo Imaging)
  1.5.4 Scientific Research (Brain Science, Functional Imaging, Medical Imaging Research, Ultra-High Field MRI Research)
  1.5.5 Veterinary Medicine (MRI Diagnosis of Pets, Companion Animals, and Large Animals)
1.6 Global Helium-free MRI Magnet Market Size & Forecast
  1.6.1 Global Helium-free MRI Magnet Consumption Value (2021 & 2025 & 2032)
  1.6.2 Global Helium-free MRI Magnet Sales Quantity (2021-2032)
  1.6.3 Global Helium-free MRI Magnet Average Price (2021-2032)

2 MANUFACTURERS PROFILES

2.1 Scientific Magnetics
  2.1.1 Scientific Magnetics Details

2.12.3 Huate Magnetoelectric Helium-free MRI Magnet Product and Services
2.12.4 Huate Magnetoelectric Helium-free MRI Magnet Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)
2.12.5 Huate Magnetoelectric Recent Developments/Updates
2.13 Mediso
2.13.1 Mediso Details
2.13.2 Mediso Major Business
2.13.3 Mediso Helium-free MRI Magnet Product and Services
2.13.4 Mediso Helium-free MRI Magnet Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)
2.13.5 Mediso Recent Developments/Updates

3 COMPETITIVE ENVIRONMENT: HELIUM-FREE MRI MAGNET BY MANUFACTURER

3.1 Global Helium-free MRI Magnet Sales Quantity by Manufacturer (2021-2026)
3.2 Global Helium-free MRI Magnet Revenue by Manufacturer (2021-2026)
3.3 Global Helium-free MRI Magnet Average Price by Manufacturer (2021-2026)
3.4 Market Share Analysis (2025)
3.4.1 Producer Shipments of Helium-free MRI Magnet by Manufacturer Revenue ($MM) and Market Share (%): 2025
3.4.2 Top 3 Helium-free MRI Magnet Manufacturer Market Share in 2025
3.4.3 Top 6 Helium-free MRI Magnet Manufacturer Market Share in 2025
3.5 Helium-free MRI Magnet Market: Overall Company Footprint Analysis
3.5.1 Helium-free MRI Magnet Market: Region Footprint
3.5.2 Helium-free MRI Magnet Market: Company Product Type Footprint
3.5.3 Helium-free MRI Magnet Market: Company Product Application Footprint
3.6 New Market Entrants and Barriers to Market Entry
3.7 Mergers, Acquisition, Agreements, and Collaborations

4 CONSUMPTION ANALYSIS BY REGION

4.1 Global Helium-free MRI Magnet Market Size by Region
4.1.1 Global Helium-free MRI Magnet Sales Quantity by Region (2021-2032)
4.1.2 Global Helium-free MRI Magnet Consumption Value by Region (2021-2032)
4.1.3 Global Helium-free MRI Magnet Average Price by Region (2021-2032)
4.2 North America Helium-free MRI Magnet Consumption Value (2021-2032)
4.3 Europe Helium-free MRI Magnet Consumption Value (2021-2032)
4.4 Asia-Pacific Helium-free MRI Magnet Consumption Value (2021-2032)

+357 96 030922
info@marketpublishers.com

4.5 South America Helium-free MRI Magnet Consumption Value (2021-2032)
4.6 Middle East & Africa Helium-free MRI Magnet Consumption Value (2021-2032)

5 MARKET SEGMENT BY TYPE

5.1 Global Helium-free MRI Magnet Sales Quantity by Type (2021-2032)
5.2 Global Helium-free MRI Magnet Consumption Value by Type (2021-2032)
5.3 Global Helium-free MRI Magnet Average Price by Type (2021-2032)

6 MARKET SEGMENT BY APPLICATION

6.1 Global Helium-free MRI Magnet Sales Quantity by Application (2021-2032)
6.2 Global Helium-free MRI Magnet Consumption Value by Application (2021-2032)
6.3 Global Helium-free MRI Magnet Average Price by Application (2021-2032)

7 NORTH AMERICA

7.1 North America Helium-free MRI Magnet Sales Quantity by Type (2021-2032)
7.2 North America Helium-free MRI Magnet Sales Quantity by Application (2021-2032)
7.3 North America Helium-free MRI Magnet Market Size by Country
  7.3.1 North America Helium-free MRI Magnet Sales Quantity by Country (2021-2032)
  7.3.2 North America Helium-free MRI Magnet Consumption Value by Country (2021-2032)
  7.3.3 United States Market Size and Forecast (2021-2032)
  7.3.4 Canada Market Size and Forecast (2021-2032)
  7.3.5 Mexico Market Size and Forecast (2021-2032)

8 EUROPE

8.1 Europe Helium-free MRI Magnet Sales Quantity by Type (2021-2032)
8.2 Europe Helium-free MRI Magnet Sales Quantity by Application (2021-2032)
8.3 Europe Helium-free MRI Magnet Market Size by Country
  8.3.1 Europe Helium-free MRI Magnet Sales Quantity by Country (2021-2032)
  8.3.2 Europe Helium-free MRI Magnet Consumption Value by Country (2021-2032)
  8.3.3 Germany Market Size and Forecast (2021-2032)
  8.3.4 France Market Size and Forecast (2021-2032)
  8.3.5 United Kingdom Market Size and Forecast (2021-2032)
  8.3.6 Russia Market Size and Forecast (2021-2032)
  8.3.7 Italy Market Size and Forecast (2021-2032)

+357 96 030922

9 ASIA-PACIFIC

9.1 Asia-Pacific Helium-free MRI Magnet Sales Quantity by Type (2021-2032)
9.2 Asia-Pacific Helium-free MRI Magnet Sales Quantity by Application (2021-2032)
9.3 Asia-Pacific Helium-free MRI Magnet Market Size by Region
  9.3.1 Asia-Pacific Helium-free MRI Magnet Sales Quantity by Region (2021-2032)
  9.3.2 Asia-Pacific Helium-free MRI Magnet Consumption Value by Region (2021-2032)
  9.3.3 China Market Size and Forecast (2021-2032)
  9.3.4 Japan Market Size and Forecast (2021-2032)
  9.3.5 South Korea Market Size and Forecast (2021-2032)
  9.3.6 India Market Size and Forecast (2021-2032)
  9.3.7 Southeast Asia Market Size and Forecast (2021-2032)
  9.3.8 Australia Market Size and Forecast (2021-2032)

10 SOUTH AMERICA

10.1 South America Helium-free MRI Magnet Sales Quantity by Type (2021-2032)
10.2 South America Helium-free MRI Magnet Sales Quantity by Application (2021-2032)
10.3 South America Helium-free MRI Magnet Market Size by Country
  10.3.1 South America Helium-free MRI Magnet Sales Quantity by Country (2021-2032)
  10.3.2 South America Helium-free MRI Magnet Consumption Value by Country (2021-2032)
  10.3.3 Brazil Market Size and Forecast (2021-2032)
  10.3.4 Argentina Market Size and Forecast (2021-2032)

11 MIDDLE EAST & AFRICA

11.1 Middle East & Africa Helium-free MRI Magnet Sales Quantity by Type (2021-2032)
11.2 Middle East & Africa Helium-free MRI Magnet Sales Quantity by Application (2021-2032)
11.3 Middle East & Africa Helium-free MRI Magnet Market Size by Country
  11.3.1 Middle East & Africa Helium-free MRI Magnet Sales Quantity by Country (2021-2032)
  11.3.2 Middle East & Africa Helium-free MRI Magnet Consumption Value by Country (2021-2032)
  11.3.3 Turkey Market Size and Forecast (2021-2032)
  11.3.4 Egypt Market Size and Forecast (2021-2032)
  11.3.5 Saudi Arabia Market Size and Forecast (2021-2032)

11.3.6 South Africa Market Size and Forecast (2021-2032)

12 MARKET DYNAMICS

12.1 Helium-free MRI Magnet Market Drivers
12.2 Helium-free MRI Magnet Market Restraints
12.3 Helium-free MRI Magnet Trends Analysis
12.4 Porters Five Forces Analysis
12.4.1 Threat of New Entrants
12.4.2 Bargaining Power of Suppliers
12.4.3 Bargaining Power of Buyers
12.4.4 Threat of Substitutes
12.4.5 Competitive Rivalry

13 RAW MATERIAL AND INDUSTRY CHAIN

13.1 Raw Material of Helium-free MRI Magnet and Key Manufacturers
13.2 Manufacturing Costs Percentage of Helium-free MRI Magnet
13.3 Helium-free MRI Magnet Production Process
13.4 Industry Value Chain Analysis

14 SHIPMENTS BY DISTRIBUTION CHANNEL

14.1 Sales Channel
14.1.1 Direct to End-User
14.1.2 Distributors
14.2 Helium-free MRI Magnet Typical Distributors
14.3 Helium-free MRI Magnet Typical Customers

15 RESEARCH FINDINGS AND CONCLUSION

I would like to order

Product name: Global Helium-free MRI Magnet Market 2026 by Manufacturers, Regions, Type and Application, Forecast to 2032

Product link: https://marketpublishers.com/r/G5C4ADE95E36EN.html

Price: US$ 3,480.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page https://marketpublishers.com/r/G5C4ADE95E36EN.html
