According to our (Global Info Research) latest study, the global Hematopoietic Stem Cells Transplantation market size was valued at USD 2487.2 million in 2023 and is forecast to a readjusted size of USD 3607.2 million by 2030 with a CAGR of 5.5% during review period.

Over 50 years of studies in the field of blood-forming stem cells i.e. hematopoietic stem cells (HSC), researchers have developed significant understanding to use HSCs as a therapy. At present, no type of stem cell, adult, embryonic or fetal has attained such sufficient status. Hematopoietic stem cell transplantation (HSCT) is now routinely used for treating patients with malignant and non-malignant disorders of blood and the immune system. Currently, researchers have observed that through animal studies HSCs have the ability to form other cells such as blood vessels, muscles, and bone.

Market competition is intense. CBR Systems, China Cord Blood Corporation, ViaCord, Thermo Fisher Scientific, STEMCELL Technologies etc. are the leaders of the industry, and they hold key technologies and patents, with high-end customers; with the development of society and the changing of consumer demand, there will be more companies enter this industry. Top 5 players accounted for about 32.09% market share.
