Abstracts

The global Hemorrhoidal Circular Stapler market size is expected to reach \$ 331 million by 2032, rising at a market growth of 3.5% CAGR during the forecast period (2026-2032).

A hemorrhoidal circular stapler is a single-use mechanical stapling device used in anorectal surgery for the treatment of internal hemorrhoids, prolapsed hemorrhoids, rectal mucosal prolapse and related anorectal mucosal disorders. It is mainly used in procedures such as Procedure for Prolapse and Hemorrhoids, Tissue Selecting Therapy and selected stapled transanal rectal resection or mucosal prolapse repair techniques. A typical device includes an anvil, stapling and cutting assembly, circular knife, titanium staples, movable handle, fixed handle, adjusting knob, safety lock, firing indicator, anal dilator, anoscope, suture threader and tissue traction accessories. During the procedure, the target mucosal or mucosal-muscular tissue is drawn into the stapler housing through purse-string suturing or selective traction. When the device is closed and fired, circular or selective rows of staples are formed while the circular knife resects excess tissue, thereby removing prolapsed mucosa, lifting the hemorrhoidal cushion, interrupting abnormal blood supply and restoring anorectal anatomy. Key performance indicators include cartridge volume, staple height, cutting diameter, compression uniformity, hemostatic performance, firing stability, tissue accommodation capacity, accessory completeness and intraoperative visualization.

In 2025, the global production volume of hemorrhoidal circular staplers is projected to reach 1.62 million units, with an average price of \$156 per unit and an average gross margin of 46.5%.

Based on our research, hemorrhoidal circular staplers should be treated as a dedicated

anorectal surgical stapling segment built around PPH, TST and selected STARR-related procedures, rather than as a generic circular stapler category. Conventional circular staplers are mainly used for gastrointestinal anastomosis, while hemorrhoidal circular staplers are designed for the anatomy and workflow of the anal canal and lower rectum. Their value lies in a larger tissue housing, appropriate staple height, accessory sets such as anal dilators and anosopes, and the ability to perform mucosal resection and stapling above the dentate line. Official product information from Ethicon and Medtronic positions these devices specifically for hemorrhoidal disease and rectal prolapse procedures, while Chinese manufacturers such as Dongxing, Kangdi, Blue Sail Surgical and Golden Stapler use PPH, TST, anorectal stapler or hemorrhoidal stapler terminology in their product materials. This supports a narrow product scope that excludes ordinary gastrointestinal circular staplers, rubber-band ligators, skin staplers and endoscopic linear cutting staplers.

From a supply perspective, the global market has moved from an early multinational-led structure toward a more diversified landscape that includes multinational brands, a large Chinese surgical stapler manufacturing cluster, Indian domestic suppliers and regional export-oriented manufacturers. Johnson & Johnson, Medtronic and B. Braun retain brand recognition and clinical familiarity in developed markets and premium hospitals. Meril represents an India-based manufacturer with a dedicated hemorrhoids stapler platform. Chinese suppliers such as Touchstone, Frankenman, Panther, Golden Stapler, Victor Medical, Waston, Kangdi, Dongxing, Blue Sail Surgical and Verykind form the most active manufacturing base for this category. Compared with powered endoscopic staplers, hemorrhoidal staplers have lower unit prices and a larger number of suppliers, but long-term hospital adoption still depends on consistent staple formation, hemostatic performance, accessory completeness, registration status, surgeon training and local procurement access.

Demand growth is driven by anorectal surgery volumes, procedure availability in emerging markets and continued use of PPH and TST techniques in selected hospitals, rather than by a broad technology-driven expansion. Hemorrhoidal disease is common, but most patients are managed conservatively or with office-based procedures, rubber-band ligation, conventional hemorrhoidectomy or energy-based treatments. Hemorrhoidal circular staplers are more relevant for internal hemorrhoids, circumferential prolapse, rectal mucosal prolapse and cases where mucosal lifting and stapled repair are clinically appropriate. Their advantages include a standardized procedural workflow, simultaneous resection and stapling, less postoperative pain compared with some conventional excisional techniques, and relatively fast recovery. However, the category is constrained by strict patient selection, procedure preference

differences across regions and concerns around bleeding, recurrence, stenosis, urgency or other postoperative symptoms in certain cases. Therefore, the market is expected to grow steadily but not rapidly.

From a technology perspective, the category is evolving from standard circular PPH devices toward TST staplers, three-row staple designs, larger tissue housings, rotatable bodies, powered firing, selective mucosal resection and accessory-based individualized procedures. B. Braun's TST33 highlights Tissue Selecting Therapy, Dongxing's anorectal stapler materials describe integrated TST functionality and rotatable structures, Shangji Medical has introduced a powered anorectal stapler platform, and Waston and Meril emphasize three-row staple designs for improved hemostatic performance. Future differentiation will focus less on basic stapling mechanics and more on tissue accommodation, compression uniformity, staple formation stability, bleeding control, ease of positioning and procedure-specific accessories. The premium segment may continue to evolve through powered firing and selective resection designs, while standard PPH products are likely to remain highly price-competitive.

This report studies the global Hemorrhoidal Circular Stapler production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Hemorrhoidal Circular Stapler and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Hemorrhoidal Circular Stapler that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Hemorrhoidal Circular Stapler total production and demand, 2021-2032, (K Units)

Global Hemorrhoidal Circular Stapler total production value, 2021-2032, (USD Million)

Global Hemorrhoidal Circular Stapler production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (K Units), (based on production site)

Global Hemorrhoidal Circular Stapler consumption by region & country, CAGR, 2021-2032 & (K Units)

U.S. VS China: Hemorrhoidal Circular Stapler domestic production, consumption, key domestic manufacturers and share

Global Hemorrhoidal Circular Stapler production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (K Units)

Global Hemorrhoidal Circular Stapler production by Type, production, value, CAGR,

2021-2032, (USD Million) & (K Units)

Global Hemorrhoidal Circular Stapler production by Application, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

This report profiles key players in the global Hemorrhoidal Circular Stapler market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Johnson & Johnson, Medtronic plc, B. Braun SE, Meril Endo Surgery Pvt. Ltd., Touchstone International Medical Science Co., Ltd., Frankenman International Limited, Panther Healthcare Medical Equipment Co., Ltd., Golden Stapler Surgical Co., Ltd., Victor Medical Instruments Co., Ltd., Waston Medical Appliance Co., Ltd., etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Hemorrhoidal Circular Stapler market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (K Units) and average price (US\$/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
