The global Hemostat Powder market size is expected to reach \$ 614 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032).

When blood vessel walls are disrupted during surgeries, there are occurrences of blood loss, which needs to get coagulated. This process of blood clot formation at the site of injury is known as hemostasis. Hence, hemostats offer temporary blockage by forming blood clot to control bleeding.

Hemostat powder is product in form of powder.

Market competition is intense. Johnson & Johnson, C. R. Bard, Pfizer, CSL Behring and Gelita Medical, etc. are the leaders of the industry, with about 70% market shares.

North America is the largest consumption place, with a consumption market share nearly 40%. Following North America, Europe is the second largest consumption place with the consumption market share of 30%.

The classification of hemostat powder includes gelatin, fibrin, cellulose and the proportion of gelatin is about 38%.

Hemostat Powder is widely used in surgical wound care and general wound care. The most proportion of hemostat powder is used in surgical wound care, and the proportion is 65%.
