The global Hemostatic Surgical Pen market size is expected to reach \$ 871 million by 2032, rising at a market growth of 7.2% CAGR during the forecast period (2026-2032).

In 2025, global Hemostatic Surgical Pen production reached approximately 3.59 million units, with an average global market price of around USD 145 per unit.

The gross profit margin of major companies in the industry is between 31.42%-56.85%.

In 2025, the global production capacity of Hemostatic Surgical Pen was approximately 4.72 million units.

Hemostatic Surgical Pen is a handheld surgical device or applicator used to support bleeding control during procedures by delivering electrical energy, heat, topical hemostatic action or controlled cautery at the treatment site. It is designed for precise operation, convenient handling and reduced tissue trauma in surgical, dental, dermatology, emergency and outpatient procedures. The market includes disposable and reusable pen-type hemostatic or electrosurgical applicators, but excludes large electrosurgical generators, sutures, ordinary scalpels and bulk hemostatic powders or sponges counted separately.

The industry chain includes medical-grade plastics, electrodes, heating elements, wires, circuit components, insulation materials, sterile packaging, batteries or connectors and sterilization services. Midstream production covers device design, precision assembly, electrical safety testing, biocompatibility evaluation, sterilization validation, packaging and quality release. Downstream demand comes from hospitals, ambulatory surgery centers, clinics, dental practices, dermatology centers and emergency care. Growth is

driven by minimally invasive procedures, outpatient surgery growth, bleeding control needs and demand for convenient disposable surgical tools.

Hemostatic Surgical Pen is a common device in clinical surgery for hemostasis and tissue cutting. It operates precisely with minor trauma. The expansion of surgical treatment drives market growth. Products will be optimized for safer use and diversified functional integration.
