It is also used before surgery to reduce the risk of blood clots. Most of the Heparin product is existed in a form of Heparin Sodium or Heparin Calcium. In this report, we mainly study the Heparin API.

The market driver mainly increasing prevalence of conditions such as renal impairment, coronary artery disease, and venous thromboembolism, High demand for anticoagulants, etc.

The expanding healthcare sector, coupled with a rising prevalence of cardiovascular diseases and thrombotic disorders, continues to drive demand for Heparin Active Pharmaceutical Ingredient (API). The growing global aging population and increasing awareness about these medical conditions have further intensified the need for effective anticoagulant therapies. Additionally, advancements in medical research and development, alongside the escalating number of surgical procedures, contribute to the

sustained growth of the Heparin API market. While, one of the significant challenges in the Heparin API market is the vulnerability of its supply chain. Dependence on porcine mucosa as the primary source, coupled with supply disruptions due to disease outbreaks and geopolitical factors, poses a risk to consistent availability. Moreover, ensuring the quality and safety of Heparin APIs remains a concern, with regulatory scrutiny focused on preventing adulteration and contamination. Balancing these challenges while navigating competition from alternative anticoagulants and addressing complex production processes poses ongoing difficulties for industry stakeholders.

The classification of Heparin includes Heparin Sodium and Heparin Calcium. In 2024, Heparin Sodium accounted for a revenue share of 96.63% in the global Heparin market. In addition, this product segment is poised to reach US\$ 2,228.35 million by 2031 from US\$ 1,184.01 million in 2024.

Heparin is widely used for UFH and LMWH. In Heparin market, the LMWH holds an important share in terms of application, and it is expected to reach a value of US\$ 1,977.66 million by 2031, at a CAGR of 7.94% during 2025 and 2031.

Europe is the largest consumption place, with a revenue market share nearly 36.86% in 2024. China is the world's largest pig production, which supplied by sufficient raw materials.

North American market for Heparin API is estimated to increase from \$ 431.49 million in 2025 to reach \$ 671.33 million by 2031, at a CAGR of 7.65% during the forecast period of 2025 through 2031.

Asia-Pacific market for Heparin API is estimated to increase from \$ 478.50 million in 2025 to reach \$ 799.46 million by 2031, at a CAGR of 8.93% during the forecast period of 2025 through 2031.
