Abstracts

The global Heparin market size is expected to reach \$ 2508 million by 2032, rising at a market growth of 7.6% CAGR during the forecast period (2026-2032).

In 2024, global Heparin production reached approximately 23,498 billion units , with an average global market price of around US\$ 52,147 per billion units. Heparin is an anticoagulant (blood thinner) that prevents the formation of blood clots. Heparin is used to treat and prevent blood clots in the veins, arteries, or lung. It is also used before surgery to reduce the risk of blood clots. Most of the Heparin product is existed in a form of Heparin Sodium or Heparin Calcium. In this report, we mainly study the Heparin API.

Global key players of Heparin include Shenzhen Hepalink Pharmaceutical, Yantai Dongcheng Pharmaceutical, Nanjing King-friend Biochemical Pharmaceutical, Pfizer, Hebei Changshan Biochemical Pharmaceutical, etc. The top five manufacturers hold a share about 54%. China is dominating the global Heparin market, has a share over 65% in terms of production. Europe and Asia-Pacific are the two largest market, both having a share about 34%, followed by North America, with a share about 30 percent.

The heparin API market is primarily driven by the rising global prevalence of cardiovascular and thromboembolic diseases, along with increasing surgical procedures. Growing aging populations and higher obesity rates contribute to sustained demand for anticoagulants. Additionally, heparin's use in treating COVID-19-associated thrombotic complications has further propelled market expansion. Pharmaceutical industry advancements in emerging markets (e.g., China and India) and the biopharmaceutical sector's demand for high-quality heparin also fuel market growth.

Key trends in the heparin API market include: 1) a technological shift from animal-

sourced heparin (porcine intestinal mucosa extraction) to synthetic alternatives (e.g., low-molecular-weight heparin); 2) stringent regulatory requirements for supply chain traceability and quality control; 3) intensified competition from biosimilars, driving process optimization and cost reduction; and 4) the rise of local pharmaceutical players in emerging markets, diversifying the global heparin supply chain.

This report studies the global Heparin production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Heparin and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
