Abstracts

The global Hepatitis A Vaccine market size is expected to reach \$ 915 million by 2032, rising at a market growth of 2.2% CAGR during the forecast period (2026-2032).

Hepatitis A vaccine is a vaccine which is against the hepatitis A virus. The Hepatitis A vaccine is available for long-term prevention of HAV infection, Minimum age for HAV vaccination is 1 year. Two types of HAV vaccines are currently available internationally:

1. Formaldehyde-inactivated vaccines: Inactivated HAV vaccines are used in most countries. Monovalent inactivated HAV vaccines are available in paediatric dose (0.5 ml) for children aged 1 year to 15 years, and in adult dose (1 ml).
2. Live attenuated vaccines (based on H2 or LA-1 HAV strains): These vaccines are manufactured and used mainly in China and sporadically in the private sector in India.

The Hepatitis A vaccine market is primarily driven by the increasing awareness of hepatitis prevention, coupled with growing vaccination programs initiated by governments and health organizations globally. As hepatitis A is a highly contagious liver infection, the rising incidence of outbreaks, especially in developing regions, is pushing demand for vaccines. Moreover, the expanding travel industry, where travelers are required to be vaccinated for hepatitis A when visiting certain high-risk regions, is further bolstering market growth. In addition, advancements in vaccine technology and the increasing availability of combination vaccines are also contributing factors. However, the market faces several challenges. One of the primary challenges is the high cost of vaccines, especially in low-income regions, limiting access for vulnerable populations. Additionally, the lack of infrastructure and healthcare facilities in remote areas poses a significant barrier to widespread vaccine distribution. In certain regions, vaccine hesitancy due to misinformation and fear of side effects also hampers market growth, making public health education and outreach essential to overcoming these

obstacles.

Global hepatitis a vaccine key players include GSK, Merck, Sanofi, etc. Global top 5 manufacturers hold a share over 80%. Asia-Pacific is the largest market, with a share over 38%, followed by North America and Europe , both have a share over 54%. In terms of product, inactivated vaccine is the largest segment, with a share about 85%. And in terms of application, the largest application is government institution, followed by private sector, etc.
