Abstracts

The global Hexagon Weld Nuts market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Hex Weld Nuts are hexagonal nuts used for welding. The shape is hexagonal, one side is the same as a hex nut, and the other side has three solder points and a boss. Three welding points are used for welding, and the boss is used for positioning. Hexagonal weld nuts act as connections. Use a welding machine to connect the hexagonal welding nut to the mother body, and then use screws to fix the required objects. Generally used with spot welding machine, the welding performance is good and the efficiency is fast. This nut is widely used in car seats, sheet metal chassis cabinets, molds, ships, railways and other industries.
