Abstracts

The global HFOs Refrigerant market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

Hydrofluoroolefins (HFOs) have received widespread attention and have been successfully used due to their excellent performance and environmental protection. However, due to the current high cost of HFOs refrigerant itself and the increase in related patent and equipment costs, its development is still in its infancy.

The fourth generation refrigerant mainly refers to HFOs refrigerants, and representative products of hydrofluoroolefins (HFOs) include R1234ze and R1234yf. Both types of refrigerants have zero ODP values and very low GWP values.

This report studies the global HFOs Refrigerant production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for HFOs Refrigerant, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2023 as the base year. This report explores demand trends and competition, as well as details the characteristics of HFOs Refrigerant that contribute to its increasing demand across many markets.
