Abstracts

High Consistency Pulp Bleaching Tower is a tower for bleaching pulp at high consistency (>25%). Bleaching tower is a kind of equipment used in pulp bleaching. Bleaching tower is required for various bleaching sections and related to the pulp concentration of each section. For bleaching or whole bleaching line, bleaching can be carried out at three different pulp concentrations of low, medium and high. From current engineering examples, it is generally considered that the pulp concentration is 3.5-6% for low concentration bleaching, 7-15% for medium concentration bleaching, and 25-30% for high concentration bleaching.
