Abstracts

The global High Expansion Acrylic Fiber market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

High expansion acrylic fiber is a kind of acrylic yarn with great expansion volume and bulkiness. The high shrinkage acrylic fiber with high shrinkage potential is prepared by drawing the acrylic fiber tow at a certain temperature. After being cut into short fibers, it is blended with conventional acrylic short fibers in a certain proportion to form yarn. After steaming, the conventional acrylic fiber is forced to be bulky due to the shrinkage of the high shrinkage acrylic fiber. It has a plump appearance, is soft and comfortable to wear, and has good thermal insulation. It is suitable for making all kinds of knitted clothing.

This report studies the global High Expansion Acrylic Fiber production, demand, key manufacturers, and key regions.
