Abstracts

According to our (Global Info Research) latest study, the global High-expansion Foam Generator market size was valued at US\$ 368 million in 2025 and is forecast to a readjusted size of US\$ 578 million by 2032 with a CAGR of 6.6% during review period.

In 2025, global sales of high-expansion foam generators reached 42,000 units, with an average selling price of US\$8,500. The upstream raw materials for high-expansion foam generators mainly include carbon steel (approximately 35%), stainless steel (30%), motor and fan components (20%), and foaming nets and seals (15%), with an annual consumption of approximately 58,000 tons. Downstream suppliers are primarily fire protection engineering contractors (40% of procurement), petrochemical and energy companies (25%), large logistics and warehousing operators (20%), and government emergency departments (15%). They are mainly used in total flooding fire suppression systems for large warehouses, airport hangars, tunnels, and industrial plants. Currently, the industry's average gross profit margin is between 38% and 50%. Future development focuses on intelligent integration (such as IoT remote monitoring and AI fire assessment), the development of explosion-proof and corrosion-resistant special models, and infrastructure safety needs in emerging markets (such as Southeast Asia and the Middle East). The combination of modular rapid deployment systems and environmentally friendly foam agents will become a core business opportunity.
