High expansion retrievable bridge plug is a downhole tool used for plugging oil and gas wells. It adopts a unique self-locking structure, has a reliable two-way pressure-bearing function, and can achieve reliable sealing without an overlying ash surface. The bridge plug can be lowered to a predetermined position underground by a cable or hydraulic sealing tool for temporary or permanent plugging. When necessary, it can be unsealed and recovered using a special unsealing tool for reuse. High expansion removable bridge plug has the advantages of wide application range, safety, reliability, and low cost.
