According to our (Global Info Research) latest study, the global High Permeability Magnetic Shielding Sheet market size was valued at USD 191.4 million in 2022 and is forecast to a readjusted size of USD 374.1 million by 2029 with a CAGR of 10.0% during review period.

Many modern electrical applications are very sensitive to Electromagnetic Interference (EMI). Higher frequency interference is usually recognized and shielded by conductive materials. However, low frequency interference and noise emitted from nearby electronic devices are overlooked or unsure the cause of problems. Because this low frequency interference is easily through these conductive layers. High Permeability Magnetic Shielding Sheet is a low-profile high μ shield materials especially developed for effective low frequency magnetic shield within the confined space.
