Abstracts

The global High Permeability Magnetic Shielding Sheet market size is expected to reach \$ 374.1 million by 2029, rising at a market growth of 10.0% CAGR during the forecast period (2023-2029).

Many modern electrical applications are very sensitive to Electromagnetic Interference (EMI). Higher frequency interference is usually recognized and shielded by conductive materials. However, low frequency interference and noise emitted from nearby electronic devices are overlooked or unsure the cause of problems. Because this low frequency interference is easily through these conductive layers. High Permeability Magnetic Shielding Sheet is a low-profile high μ shield materials especially developed for effective low frequency magnetic shield within the confined space.

This report studies the global High Permeability Magnetic Shielding Sheet production, demand, key manufacturers, and key regions.
