High Power Laser Cleaning Systems are advanced devices used for the removal of contaminants, rust, paint, and other unwanted materials from surfaces using high-intensity laser beams. These systems operate by directing a concentrated laser beam onto a surface, where the energy is absorbed by the contaminants and causes them to vaporize or be blown away by a shockwave. These systems typically have a power output above 500w, allowing them to clean surfaces more efficiently and effectively compared to lower-power systems.
