The global High Power Laser Machine market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

High Power Laser Machine, for which there is no official definition, but experts agree that high power lasers are at least a few hundred watts. These high power laser systems represent the best choice for aircraft survival equipment and cover the VIS, NIR, SWIR, MWIR and LWIR wavelengths. The high power laser systems allow the user to specify the combination of wavelength and power, so you can tailor them to your specific requirements. The modular design allows you to mix and match wavelengths and optical powers from a single product line. This can be used for applications such as the military.
