The global High Precision Desktop Multimeter market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

A high-precision desktop multimeter is an instrument used to measure electrical parameters such as voltage, current, resistance, and frequency. It usually has higher precision and more functions, and is suitable for work scenarios that require higher precision measurements. High-precision desktop multimeters usually have the following characteristics:

1. High-precision measurement: Compared with ordinary handheld multimeters, high-precision desktop multimeters have higher measurement accuracy. It can provide more accurate measurement results and is suitable for work that requires high measurement accuracy.
2. Large-screen display: High-precision desktop multimeters are usually equipped with a large LCD display, which can clearly display measurement results and other relevant information. This makes it easier for users to read and analyze measurement data.
3. Multi-function measurement: High-precision desktop multimeters usually have multiple measurement functions, such as voltage, current, resistance, frequency, capacitance, temperature, etc. It can meet various measurement needs in different working scenarios.
4. Data recording and storage: Some high-precision benchtop multimeters also have data recording and storage functions. It can record multiple sets of measurement data, and can transmit the data to a computer or other devices for analysis and storage through the USB interface or other methods.
5. Expansibility and programmability: Some high-precision benchtop multimeters have expansion slots or programmable interfaces, which can be connected to various measurement modules or customized programming. This allows users to expand and customize measurement functions according to their needs.

High-precision desktop multimeters are usually widely used in laboratories, factories, electronic maintenance, research and development, etc., for various precision measurement and

testing work.
