A high-pressure coil nailer is a type of nail gun that is specifically designed to drive nails into hard materials such as hardwood, concrete, or steel. It uses high-pressure air to drive nails quickly and efficiently, making it ideal for heavy-duty construction projects. These nailers typically use coiled nails, which are held together in a long strip or coil, allowing for more nails to be loaded into the gun at once. High-pressure coil nailers are commonly used in framing, decking, and other construction applications where a strong and reliable fastening method is required.
