According to our (Global Info Research) latest study, the global High Pressure Foam Gun market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

The high pressure foam gun mixes and pressurizes water with detergent through a high-pressure pump, and then sprays rich foam at high pressure through a specially designed nozzle. This high pressure spray method can clean stubborn stains more effectively. At the same time, the foam has stronger coverage and penetration capabilities, and can deeply clean the fine pores and gaps on the surface.
