The global High-pressure Nozzle market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The nozzle is the last part in the watercourse of high pressure and ultra high pressure cleaners. before the cleaning medium reaches the nozzle, it runs from the water inlet first through the pump system and then gets through the high pressure hose to the gun and finally to the lance. High-pressure nozzles are ideally suited for the most stubborn dirt and in particular for high-pressure cleaning and steam jet cleaners.
