The global High Pressure Sandblasting Machine market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

High-pressure sandblasting machine is a kind of equipment used to spray high-speed and high-pressure sandblasting, which is often used in surface treatment and cleaning work. It usually consists of high-pressure pumps, nozzles, blasting pipes, blasting media (usually sand or other particles) and other components. The high-pressure sandblasting machine accelerates the sandblasting medium through the nozzle, and sprays it onto the surface to be treated at high speed and high pressure, so as to achieve cleaning, rust removal, decontamination, and surface preparation before painting.
