Abstracts

According to our (Global Info Research) latest study, the global High-Purity Centella Asiatica Triterpene Actives market size was valued at US$ 26.34 million in 2025 and is forecast to a readjusted size of US$ 57.82 million by 2032 with a CAGR of 11.9% during review period.

In 2025, the global sales volume of High-Purity Centella Asiatica Triterpene Actives reached approximately 33,300 kg, with an average selling price of about US$768 per kg. High-Purity Centella Asiatica Triterpene Actives refer to high-content functional botanical active ingredients derived from Centella asiatica triterpene compounds through extraction, separation, purification, standardization, and quality control processes. The product scope mainly covers mixed triterpene actives, madecassoside, asiaticoside, asiatic acid, and madecassic acid. These products are generally supplied in the form of powder, crystalline powder, standardized extracts, or cosmetic active ingredients, with key technical features including clearly defined triterpene composition, high active content, batch-to-batch consistency, validated analytical methods, and formulation-ready quality control. High-Purity Centella Asiatica Triterpene Actives are mainly used in cosmetics and personal care products, medical skin repair and scar management products, nutritional health products, and pharmaceutical research, with core functions including soothing and repair support, anti-inflammatory support, skin barrier repair, wound healing support, collagen synthesis support, and antioxidant formulation support. This research focuses on high-content Centella asiatica triterpene active ingredients used in downstream formulations and finished product manufacturing, mainly covering commercial ingredient forms such as TECA, CAST, Madecassoside, Asiaticoside, Asiatic Acid, Madecassic Acid, and Total Triterpenes.

High-Purity Centella Asiatica Triterpene Actives represent the upgrade of Centella asiatica ingredients from ordinary botanical extracts to high-content, highly standardized, and efficacy-oriented active ingredients. The global market size is estimated at approximately US$25.6 million in 2025 and is expected to reach around US$28.6 million in 2026, with further growth to about US$57.0 million by 2032, representing a CAGR of approximately 12.2% from 2026 to 2032. This market should not be inflated by including finished Cica skincare products or ordinary low-content Centella extracts. Instead, the scope should focus on high-content commercial ingredients such as TECA, CAST, Madecassoside, Asiaticoside, Asiatic Acid, Madecassic Acid, and Total Triterpenes. Overall, this is a medium-sized market with meaningful product barriers, brand premium potential, and strong downstream application stickiness.

On the demand side, functional skincare, sensitive skin care, post-procedure repair, scar management, and skin barrier repair are the key growth drivers for High-Purity Centella Asiatica Triterpene Actives. Compared with ordinary Centella extracts, high-purity triterpene actives offer clearer active composition, more stable analytical indicators, and better formulation controllability, making them more suitable for premium cosmetics, medical skin repair products, and research-oriented customers. As consumers pay more attention to soothing, repair, anti-inflammatory support, and barrier restoration claims, brand owners and formulators are expected to increase their demand for high-purity, standardized, and traceable Centella active ingredients.

On the supply side, European players such as SEPPIC, Givaudan, and Indena have early advantages in branded ingredients, regulatory compliance, efficacy validation, and international customer access. Chinese manufacturers are rapidly strengthening their positions in botanical extraction, monomer separation and purification, cost control, and the supply of high-purity Madecassoside and Asiaticoside. Future competition will shift from simply offering Centella extract to the ability to provide stable high-content triterpene actives, clearly define key active compounds, support reliable analytical methods, and build long-term formulation partnerships with cosmetics, medical skin repair, and nutritional health customers. Companies with branded ingredient capabilities, strong quality systems, batch-to-batch consistency, and application development support are more likely to enter the global core supply chain.

This report is a detailed and comprehensive analysis for global High-Purity Centella Asiatica Triterpene Actives market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand

trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global High-Purity Centella Asiatica Triterpene Actives market size and forecasts, in consumption value ($ Million), sales quantity (kg), and average selling prices (US$/kg), 2021-2032

Global High-Purity Centella Asiatica Triterpene Actives market size and forecasts by region and country, in consumption value ($ Million), sales quantity (kg), and average selling prices (US$/kg), 2021-2032

Global High-Purity Centella Asiatica Triterpene Actives market size and forecasts, by Type and by Application, in consumption value ($ Million), sales quantity (kg), and average selling prices (US$/kg), 2021-2032

Global High-Purity Centella Asiatica Triterpene Actives market shares of main players, shipments in revenue ($ Million), sales quantity (kg), and ASP (US$/kg), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for High-Purity Centella Asiatica Triterpene Actives

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global High-Purity Centella Asiatica Triterpene Actives market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include SEPPIC, Givaudan, Indena S.p.A., Guilin TECA Ingredient Corp., Xi'an Kintai Biotech, Inc., Plamed Green Science Group, Shanghai Cosroma Biotech Co., LTD., Xi'an Chen Lang

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

High-Purity Centella Asiatica Triterpene Actives market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

The content of the study subjects, includes a total of 15 chapters:

Chapter 1, to describe High-Purity Centella Asiatica Triterpene Actives product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top manufacturers of High-Purity Centella Asiatica Triterpene Actives, with price, sales quantity, revenue, and global market share of High-Purity Centella Asiatica Triterpene Actives from 2021 to 2026.

Chapter 3, the High-Purity Centella Asiatica Triterpene Actives competitive situation, sales quantity, revenue, and global market share of top manufacturers are analyzed emphatically by landscape contrast.

Chapter 4, the High-Purity Centella Asiatica Triterpene Actives breakdown data are shown at the regional level, to show the sales quantity, consumption value, and growth by regions, from 2021 to 2032.

Chapter 5 and 6, to segment the sales by Type and by Application, with sales market share and growth rate by Type, by Application, from 2021 to 2032.

Chapter 7, 8, 9, 10 and 11, to break the sales data at the country level, with sales quantity, consumption value, and market share for key countries in the world, from 2021 to 2026.and High-Purity Centella Asiatica Triterpene Actives market forecast, by regions, by Type, and by Application, with sales and revenue, from 2027 to 2032.

Chapter 12, market dynamics, drivers, restraints, trends, and Porters Five Forces analysis.

Chapter 13, the key raw materials and key suppliers, and industry chain of High-Purity Centella Asiatica Triterpene Actives.

Chapter 14 and 15, to describe High-Purity Centella Asiatica Triterpene Actives sales channel, distributors, customers, research findings and conclusion.
