Dihydroquercetin, also known as taxifolin, is a natural flavonoid found in various plants such as Siberian larch, milk thistle, and onions. It is known for its potent antioxidant, anti-inflammatory, and anti-aging properties, making it a popular ingredient in dietary supplements and skincare products. Structurally related to the well-known flavonoid quercetin, dihydroquercetin offers better water solubility and stability, which enhances its bioavailability and therapeutic potential. Research suggests it may support cardiovascular health, improve immune function, and protect cells from oxidative stress. High purity dihydroquercetin in this report refers product with purity not less than 92%.

The market for dihydroquercetin is primarily driven by growing consumer demand for natural antioxidants and health-promoting supplements, as awareness of chronic diseases and oxidative stress-related conditions increases globally.
