According to our (Global Info Research) latest study, the global High Purity Ethyl 3-ethoxypropionate market size was valued at USD 551.5 million in 2023 and is forecast to a readjusted size of USD 755.3 million by 2030 with a CAGR of 4.6% during review period.

Ethyl 3-Ethoxypropionate is a slow evaporating ether-ester solvent with excellent activity for a wide range of coating polymers . Its linear structure and propionyl group in the center of the molecule give this material a combination of desirable properties not found in other solvents.

According to our survey, the global paints and coatings market is valued at \$174.3 billion in 2022. The waterborne segment led the market, holding the largest share of over 39%. Increasing spending in the construction industry and consumer preference for eco-friendly products are expected to support the segment's growth beyond the expected period. By 2030, the global construction value is expected to grow by 85% to reach USD 15.5 trillion. The decorative coatings market accounts for approximately 45% of the \$75 billion global paints and coatings market. The demand for paints and coatings in the automotive industry is on the rise due to increased overall vehicle demand and aging vehicles. Paints and coatings for the automotive industry are also evolving. One such development is the use of smart coatings as they offer the potential to significantly improve surface durability while adding additional functions or properties such as self-healing, superhydrophobicity, self-layering, self-sensing, sound insulation, and vibration damping. Key market players PPG BASF Sherwin-Williams Diamond Paints has strengthened its market position by focusing primarily on the construction and automotive industries.
