Abstracts

The global High-purity Nickel Sulfate Solution market size is expected to reach \$ 1845 million by 2032, rising at a market growth of 8.9% CAGR during the forecast period (2026-2032).

In 2025, global production of high-purity nickel sulfate solution reached 280,000 tons, with an average selling price of US\$3,540 per ton. High-purity nickel sulfate solution refers to a nickel salt solution formed by dissolving nickel sulfate in water. Industrially, it is commonly used as an electroplating solution, nickel electrowinning electrolyte, and intermediate solution for catalysts and battery material precursors. The upstream mainly consists of nickel intermediates and high-purity nickel raw materials, including nickel matte, MS/MHP, and nickel cathodes; high-purity nickel sulfate solution is obtained through dissolution, purification, solvent extraction, crystallization, or direct solution preparation. Downstream connections include ternary precursor/cathode material plants, electroplating plants, surface treatment plants, catalyst and chemical users. Gross profit margin ranges from approximately 15% to 35%.

This report studies the global High-purity Nickel Sulfate Solution production, demand, key manufacturers, and key regions.
