## Abstracts

Pinene is a collection of unsaturated bicyclic monoterpenes. Two geometric isomers of pinene are found in nature,  $\alpha$ -pinene and  $\beta$ -pinene.  $\alpha$ -Pinene is an organic compound of the terpene class, one of two isomers of pinene. It is an alkene and it contains a reactive four-membered ring. It is found in the oils of many species of many coniferous trees, notably the pine. It is also found in the essential oil of rosemary and *Satureja myrtifolia*. Both enantiomers are known in nature; (1S,5S)- or (?)- $\alpha$ -pinene is more common in European pines, whereas the (1R,5R)- or (+)- $\alpha$ -isomer is more common in North America. The racemic mixture is present in some oils such as eucalyptus oil and orange peel oil. Beta-Pinene ( $\beta$ -pinene) is a monoterpene, an organic compound found in plants. It is one of the two isomers of pinene, the other being  $\alpha$ -pinene. It is colorless liquid soluble in alcohol, but not water. It has a woody-green pine-like smell.
