High Purity Psyllium Husk Powder is a refined dietary fiber ingredient produced by cleaning, dehusking, milling, and sieving psyllium husks to achieve high fiber content and low impurity levels. It offers excellent water-holding capacity and viscosity, supporting bowel regularity and glycemic control. It is widely used in dietary supplements, functional foods, gluten-free baking, and pharmaceutical formulations as a natural bulking and thickening agent. Purity is critical for sensory quality, microbiological control, and regulatory compliance in food and health products.

The industrial chain starts with upstream cultivation and harvesting of psyllium seeds, followed by husk separation and primary drying. Midstream processing includes sterilization, micronization, grading, blending, and moisture control, plus packaging for food-grade handling. Downstream applications include nutraceutical brands, food manufacturers, pharmaceutical excipient users, and contract formulators. Supporting

services include pesticide residue testing, microbial testing, certification, and export compliance management.
