The global High Purity Semiconductor Grade Solvent market size is expected to reach \$ 4158.3 million by 2029, rising at a market growth of 6.2% CAGR during the forecast period (2023-2029).

The key manufacturers of High Purity Semiconductor Grade Solvents in the world are Mitsubishi Chemical, Stella Chemifa, CMC Materials, Chang Chun Group, Jiangsu Micro Electronic Materials, Crystal Clear Electronic Material, Honeywell, and others. The top five manufacturers have a market share of nearly 40%, and CMC Materials is currently the largest producer. The production of high-purity semiconductor grade solvents worldwide is mainly distributed in regions such as North America, Europe, China, and Japan, with the top three production regions accounting for over 95% of the market share. In terms of product types, the growth rate of functional chemicals is relatively fast, but the market share of ultra-high purity reagents is the highest, close to 70%, followed by functional chemicals. In terms of its applications, IDM companies is the largest application field, with a market share of over 60%, followed by OEM companies.

High purity semiconductor grade solvents are specifically made for the semiconductor manufacturing industries and electronic industries. These solvents contain extremely low levels of metals down to the levels of parts per billion or parts per trillion. Multiple purifications are required to achieve the required purity.
