## Abstracts

According to our (Global Info Research) latest study, the global High Purity Trifluoroiodomethane market size was valued at US\$ 71.5 million in 2024 and is forecast to a readjusted size of USD 97 million by 2031 with a CAGR of 4.5% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

The molecular formula of trifluoroiodomethane is CF<sub>3</sub>I. As a new type of environmentally friendly insulating gas, it is used in the power industry to replace SF<sub>6</sub>. It has good environmental properties and its insulation strength is better than SF<sub>6</sub>. The breakdown and decomposition of CF<sub>3</sub>I will not produce toxic products, and it will not affect the insulation strength under certain conditions.
