Abstracts

According to our (Global Info Research) latest study, the global High-speed Chinese Medicine Pulverizer market size was valued at US\$ 476 million in 2024 and is forecast to a readjusted size of USD 620 million by 2031 with a CAGR of 3.8% during review period.

High-speed Chinese medicine pulverizer mainly utilizes the high-speed relative motion between the movable toothed disc and the fixed toothed disc, or the high-speed rotating pulverizing blade to impact and shear the material. At the same time, the materials will also impact each other, and the pulverizing effect is achieved under the combined effect. High-speed Chinese medicine pulverizer can quickly crush various soft and hard medicinal materials, such as Ganoderma lucidum, Panax notoginseng, American ginseng, etc., and is suitable for Chinese medicine pharmacies, drugstores, Chinese medicine processing plants and other places. The product fineness can reach a certain standard (such as 200 mesh), which is more effective for precious Chinese medicines that are easy to stick and difficult to crush. In addition, high-speed Chinese medicine pulverizer is not only suitable for Chinese medicinal materials, but also can be used to crush plant fibers, high hardness, high toughness materials, such as inorganic substances, minerals, etc.
