High-speed fabric doors and high-speed steel roll-up doors are two common types of doors in the industrial field, widely used in places such as warehouses, factories and logistics centers. Their main functions are to improve operating efficiency, save energy, and provide safety and environmental protection. High-speed fabric doors (also known as fast rolling shutter doors) are mainly made of flexible fabric materials, usually including PVC coated with polyester fiber. This type of door is designed to operate quickly and reliably under frequent opening and closing conditions. High-speed steel roll-up doors are made of steel or aluminum, with higher strength and safety, and are suitable for industrial environments that require higher safety standards.
