## Abstracts

A high-speed precision die-cutting machine is an industrial equipment used to cut materials into specific shapes and sizes quickly and accurately. This kind of machine is usually used for die-cutting operations of non-metallic materials, self-adhesive, EVA, double-sided tape, electronic products and mobile phone rubber pads, including full cutting, half-breaking, indentation and hot stamping operations, lamination and automatic arrangement. Waste and other processes. The die-cutting machine uses steel knives, hardware molds, steel wires or steel plates carved into templates, and applies a certain amount of pressure through the embossing plate to cut the printed matter or cardboard into a certain shape. This is an important equipment for post-printing packaging processing and molding, and is widely used in packaging, automotive, electronics and other industries.
