According to our (Global Info Research) latest study, the global High Speed Steel End Mill market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

An HSS end mill is a tool used primarily for machining square metal or non-metal objects. Unlike a twist drill, which creates a circular hole, an end mill rotates and moves straight to enlarge a hole horizontally. End mills are made of two primary materials: HSS (high-speed steel) and cemented carbide. HSS end mills are common, while cemented carbide ones are better suited for cutting harder materials.

High Speed Steel End Mills are cutting tools used in various industries such as aerospace, automotive, and manufacturing for milling operations.
